# TB Electronic Signature and Approval Protocol

INSTRUMENT 09 | TradingBible Holdings, Inc. | Delaware, United States | tradingbible.app

## 1. Corporate identity

TradingBible Holdings, Inc. is a Delaware corporation organized under the laws of the State of Delaware, under Delaware, United States. Its registered agent is A Registered Agent, Inc., 8 The Green, Suite A, Dover, Delaware 19901. The Company operates the TradingBible technology platform at tradingbible.app.

## 2. Authority and interpretation

This instrument is subject to the Company's effective Bylaws, applicable law, contractual obligations, and approvals reserved to members. Malik Nlem is identified as Chief Executive Officer in the Company records. No provision authorizes activity requiring a license, registration, or regulatory consent that has not been obtained.

## 3. Execution architecture

Each proposed IPO instrument shall have a unique document ID, a controlled version, an authorized approval path, and the identities and capacities of intended signatories.

## 4. Electronic routing

TradingBible.app may submit the signature-ready version to DocuSign after internal approval. Completion webhooks must be authenticated, recorded idempotently and reconciled to the correct document and envelope.

## 5. Approval distinctions

A signed board resolution does not substitute for member approval where required; a signed registration draft does not establish SEC effectiveness; and a signed exchange application does not constitute listing approval.

## 6. Retention

Executed copies, certificates of completion, audit logs, and underlying authorization records shall be retained in an access-controlled repository without altering the signed original.

## Execution and signature record

The DocuSign tabs are anchored only to the unique execution line in each signer's block. Complete only the fields assigned to your capacity. A completed envelope is not a regulatory approval or a listing approval.
