TRADINGBIBLE HOLDINGS, INC.

CONFIDENTIAL FUNDRAISING DRAFT

Fundraising Structure and Readiness Memorandum

Private placement and Regulation CF decision framework

FR-00 · VERSION 1.0 · 10 NOVEMBER 2026

DRAFT · NOT EXECUTED · COUNSEL REVIEW REQUIRED

This is a confidential drafting instrument for internal review and counsel. It is not an offer to sell, a solicitation of an offer to buy, a filing, a qualification, an approval or an executed agreement. No securities have been offered, sold or issued by reason of this document.

> ***Status.*** *Internal decision memorandum. This document is not an offer, solicitation, private placement memorandum, prospectus, filing or legal opinion. It records the decisions that must be made before any fundraising communication leaves the company.*

1. Purpose

TradingBible Holdings, Inc. is considering a financing to support product delivery, operating costs and the public launch programme. This memorandum compares the two structures that can realistically be prepared from the company's current record:

1. a private placement to accredited U.S. investors under Rule 506(b) of Regulation D, together with an offshore tranche under Regulation S; and
2. a future Regulation CF offering through a FINRA-registered funding portal, if the company, its disclosures and its financial records are ready.

The company should not run both tracks at the same time without a written allocation policy. A public crowdfunding campaign and a quiet private placement create different disclosure, solicitation and recordkeeping obligations. Mixing them casually is a compliance defect, not a marketing choice.

2. Company facts relied on

Item	Current record
Legal name	TradingBible Holdings, Inc.
Legal form	Delaware corporation — to be confirmed by counsel
Domicile	Delaware, United States — to be confirmed by counsel
Business	Financial-technology platform, trading intelligence, education and analytics
Public launch date	25 December 2026
Public plans	Free account and TradingBible Premium at US$19.99 per month or US$199 per year
Securities issuer	TradingBible Holdings, Inc.
Public ticker	TB is proposed only — not reserved, approved or listed
Native digital asset	TBC is proposed — no token has been issued and no sale is open
Broker-dealer / adviser status	Not licensed as a broker-dealer, investment adviser, exchange or custodian
Fund status	TradingBible Capital has no fund vehicle, PPM, auditor, administrator, prime broker, custody or track record

The company must not add revenue, customer, subscriber, AUM, valuation, approval or performance claims to any offering document unless the figure is supported by a current company record and, where required, an audit or reviewed financial statement.

3. Recommended structure

The recommended first step is a private placement of post-money SAFE instruments, subject to the following conditions:

- the board adopts a written resolution approving the form of SAFE, the maximum aggregate purchase price, the minimum investment, the valuation cap, the use-of-proceeds budget and the officer authority;
- offers are made only to persons with whom the company has a pre-existing substantive relationship, and only to accredited U.S. investors or eligible non-U.S. investors;
- there is no general solicitation, public advertisement, social-media campaign, mass email, webinar open to the public or press release announcing the offering;
- every investor completes the accredited-investor or Regulation S certificate, the bad-actor questionnaire and the risk acknowledgment before signing;
- the company files Form D within 15 calendar days after the first sale and makes any required state notice filings;
- DocuSign is used for execution, but only after the signer's identity and capacity are verified; and
- no funds are accepted until the company has verified the investor, the subscription documents and the funding instructions.

A Regulation CF offering should be treated as a separate, later decision. It requires a FINRA-registered intermediary, a Form C offering statement, SEC qualification, a portal account, investor-limit controls, escrow arrangements and ongoing reporting. It is not a shortcut around the private-placement gates.

4. Offering parameters to be approved

The board must complete the following schedule before any document is sent. Empty or bracketed fields are deliberate.

Parameter	Required board decision
Instrument	Post-money SAFE — valuation cap, no discount
Maximum aggregate purchase price	US$[_____]
Minimum investment	US$[_____]
Valuation cap	US$[_____] post-money
Discount	None
Pro rata rights	[Yes / No — specify threshold]
Offering period	From [_____] to [_____], unless extended by the board
Use of proceeds	See the board-approved budget in Schedule A of FR-01
Maximum dilution	[_____]% on a fully diluted basis, subject to cap-table reconciliation
Related-party participation	Permitted only on the same terms, with written conflict approval
Closing conditions	Verified eligibility, completed documents, cleared funds and counsel sign-off

DRAFT · COUNSEL REVIEW REQUIRED

Parameter	Required board decision
Form D filing owner	[Name / role]
Investor records owner	[Name / role]

No officer may fill these fields by implication. The board resolution and the officer's certificate must match the executed SAFE exactly.

5. Private placement mechanics

5.1 Rule 506(b)

Rule 506(b) permits an issuer to sell securities to an unlimited number of accredited investors and to up to 35 non-accredited investors, provided that the issuer does not use general solicitation or general advertising and that each non-accredited investor receives the required disclosure. The company should not rely on the 35 non-accredited investor allowance for this round unless counsel confirms the disclosure package and the investor's sophistication. The practical standard is: accredited investors only in the United States.

The company must have a reasonable belief that each U.S. purchaser is accredited. A self-certification questionnaire is evidence, but it is not a substitute for a reasonable verification process where the facts call for one. The company should retain the questionnaire, the investor's supporting information and the basis for its conclusion.

5.2 Regulation S

Regulation S is available for offers and sales outside the United States that are made in an offshore transaction and are not directed selling efforts into the United States. The company should use it only for investors who are not U.S. persons and who provide a completed Regulation S certificate. A non-U.S. mailing address alone is not sufficient. The company must also consider the laws of the investor's home jurisdiction, sanctions and AML requirements.

5.3 No general solicitation

For the Rule 506(b) tranche, the company must not:

- publish an offering page, teaser, "invest now" button or public form;
- send the same offer to a purchased list or an unrestricted social-media audience;
- speak at a public event about the offering in a way that invites investment;
- allow investors to forward the package to others without a documented introduction; or
- use the public TradingBible website, app, TV surface or social accounts to announce the round.

The existing investor-relations subscription list is not an offering list. A person who subscribed to company updates has not thereby been pre-qualified as an investor.

6. Regulation CF alternative

A Regulation CF offering may be considered only after the company has:

- selected a FINRA-registered funding portal or broker-dealer and completed the intermediary's onboarding;

- prepared a Form C offering statement, including the required financial statements and disclosures;
- obtained SEC qualification of the offering statement;
- established escrow and investor-limit controls with the portal;
- adopted a communications policy that distinguishes pre-qualification education from a live offering; and
- accepted that the campaign will be public and that the company cannot control who sees it.

The company should not describe a Regulation CF campaign as “approved,” “live” or “open” until the SEC has qualified the offering statement and the portal has opened the campaign. A portal application, a draft Form C or a testing-the-waters communication is not qualification.

7. Use of proceeds

The board should approve a budget before the offering begins. The following categories are a framework, not an approved allocation:

Category	Board-approved amount	Percentage	Evidence of use
Product, engineering and terminal infrastructure	US$[_____]	[___]%	Payroll and contractor records
Security, compliance and legal	US$[_____]	[___]%	Engagement letters and invoices
Market data, cloud and vendor costs	US$[_____]	[___]%	Vendor contracts and invoices
Growth, partnerships and launch	US$[_____]	[___]%	Campaign records and invoices
Working capital and reserve	US$[_____]	[___]%	Treasury records
Total	**US$[_____]**	**100%**	

The company must not state that any category is “fully funded,” “committed” or “approved” until the board has adopted the budget and the funds are actually received.

8. Communications rules

The following rules apply to every director, officer, employee, contractor and agent:

1. No offering communication may be sent from a personal account, a shared inbox or an unapproved marketing tool.
2. No communication may describe the company as “SEC approved,” “IPO ready,” “guaranteed,” “pre-vetted” or “safe.”
3. No projection, valuation, revenue figure or return scenario may be used unless it is in the approved package and clearly labelled as an assumption.
4. Every private-placement email must be one-to-one, identify the recipient, state that it is confidential and include the approved risk disclosure.
5. Every DocuSign envelope must be prepared from the controlled PDF and sent only to the verified signer.
6. Every investor question that could affect the offering terms must be routed to the CEO and counsel and recorded in the investor log.

DRAFT · COUNSEL REVIEW REQUIRED

7. No wire instructions may be sent in an email. Funding instructions must be delivered through a separately verified channel and confirmed by a call-back to a known number.

9. DocuSign and records

DocuSign will be used for completion fields and signature. The company must:

- verify the signer's legal name, email, capacity and authority before sending;
- use the controlled PDF generated from the current document version;
- anchor tabs only to the signer's own execution block and completion fields;
- retain the certificate of completion, the completed PDF and the envelope history;
- record any resend, correction, decline or void in the execution register; and
- treat a completed envelope as execution evidence, not as a regulatory approval or an admission that the offering is complete.

10. Gates before the first external communication

- [ ] Board adopts FR-01 and, if applicable, FR-02.
- [ ] Cap table is reconciled and the fully diluted basis is documented.
- [ ] Valuation cap, minimum investment and maximum raise are approved.
- [ ] Use-of-proceeds budget is adopted.
- [ ] Counsel reviews the SAFE, the summary, the questionnaires and the risk disclosure.
- [ ] Bad-actor diligence is completed for the company and its covered persons.
- [ ] Investor eligibility and verification process is documented.
- [ ] Form D and state notice process is assigned to a named owner.
- [ ] DocuSign production credentials and signer authority are confirmed.
- [ ] Investor communication templates are approved and locked.
- [ ] The public website contains no offering page, "invest now" button or solicitation.
- [ ] A written record confirms that no general solicitation has occurred.

DRAFT · COUNSEL REVIEW REQUIRED

11. Decision requested

The board is asked to choose one of the following:

1. **Proceed with the private placement.** Adopt FR-01, complete FR-03, and authorize counsel to finalize the private-placement package.
2. **Prepare for Regulation CF only.** Adopt FR-02 and defer all private-placement communications.
3. **Pause fundraising.** Continue operating the platform and revisit the decision after the launch record and financial statements are ready.

No option authorizes a public offering, a token sale or the acceptance of funds before the applicable gates are satisfied.

12. Acknowledgment

This memorandum is a working record. It must be read with the company dossier, the blocked-items register and the current board minutes. If any statement here conflicts with a signed instrument or a regulatory filing, the signed instrument or filing controls, and the conflict must be resolved by counsel before further use.

DRAFT · COUNSEL REVIEW REQUIRED

Execution and signature record

The DocuSign tabs are anchored only to the unique execution line in each signer's block. Complete only the fields assigned to your capacity. A completed envelope is execution evidence; it is not a regulatory approval, an SEC qualification or an offer capable of acceptance.
