TRADINGBIBLE HOLDINGS, INC.

CONFIDENTIAL FUNDRAISING DRAFT

Offering Statement Narrative and Risk Factors

Regulation CF disclosure drafting template

FR-22 · VERSION 1.0 · 10 NOVEMBER 2026

DRAFT · NOT EXECUTED · COUNSEL REVIEW REQUIRED

This is a confidential drafting instrument for internal review and counsel. It is not an offer to sell, a solicitation of an offer to buy, a filing, a qualification, an approval or an executed agreement. No securities have been offered, sold or issued by reason of this document.

> ***Draft disclosure narrative.*** *This is a drafting template for a possible Regulation CF offering. It is not a Form C, an offering statement, a prospectus or a solicitation. Do not publish it. Financial, ownership, management and use-of-proceeds fields must be completed from verified records and reviewed by counsel before any filing.*

1. Summary of the company

TradingBible Holdings, Inc. is a corporation organized under the laws of the State of [Delaware] (jurisdiction to be confirmed by counsel) that operates the TradingBible platform, a financial-technology product for traders, investors and students. The platform combines a trading terminal, a broker-synced journal, risk and performance analytics, AI-generated reviews, market data, structured education, funded evaluations and a member community.

The company's public launch date is **25 December 2026**. The public plans are a **Free** account and **TradingBible Premium** at **US$19.99 per month or US$199 per year**. Academy 2.0 is offered through the Academy surface and has its own enrollment and pricing. The company is not a broker-dealer, investment adviser, exchange, custodian or fund.

> ***Drafting note.*** *Do not add revenue, subscriber, AUM, approval, partnership or performance claims unless the figure is supported by a current company record and, where required, a reviewed or audited financial statement.*

2. The problem

Retail traders often work across disconnected charts, brokers, spreadsheets, journals, courses and social feeds. The result is a fragmented record: the trade is in one system, the reason is in another, the review is in a third and the risk data is rarely connected to the decision. That fragmentation makes it difficult to learn from mistakes, demonstrate a process or improve discipline.

3. The product

Surface	What it does	Current state
TradingBible Terminal	Charts, watchlists, layouts, order flow, analytics and a trading workspace	Operating
Trade Journal	Broker-synced entries, exits, notes, tags and a decision record	Operating
Analytics and risk	Performance, drawdown, expectancy, discipline, position sizing and ruin analysis	Operating
SI reports and coach	AI-generated daily and weekly reviews grounded in the member's own record	Operating
Signals and market tools	Market signals, alerts, heatmaps, order flow and an economic calendar	Operating, with honest empty states
Academy 2.0	Four schools, 17 structured paths, 76 courses and 347 lessons	Operating
Funded evaluations	Two-step, one-step and dollar-ruled futures evaluations	Operating

Surface	What it does	Current state
Community and TV	Member community, webinars and broadcast-style market content	Operating
Billing	Free and Premium plans	Operating at the published price, subject to the live checkout state

4. Business model

The company generates revenue from subscriptions, Academy enrollment, funded-evaluation fees and selected partner or affiliate arrangements. The public catalog currently lists:

- **Free** — a no-cost account with limited access;
- **TradingBible Premium — US$19.99 per month** or **US$199 per year**;
- **Academy 2.0** — separate enrollment and pricing on the Academy surface; and
- **Funded evaluations** — separate evaluation fees and rules on the funded-evaluation surface.

The company does not promise that any plan will remain at the same price, that any discount will continue or that any product will be available in every jurisdiction.

5. Market opportunity

The company's thesis is that traders and investors will pay for a connected record that helps them make better decisions, not for another isolated chart. The market includes trading software, market data, education, journaling, analytics, AI research and funded-evaluation products.

> ***Drafting note.*** *Add market-size figures only if they come from a cited, current source and counsel approves their use. Do not present a total addressable market as the company's revenue opportunity.*

6. Use of proceeds

The company intends to use the net proceeds for the following categories, subject to the board-approved budget:

Category	Amount	Percentage	Purpose
Product, engineering and terminal infrastructure	US$[_____]	[___]%	Build and operate the platform
Security, compliance and legal	US$[_____]	[___]%	Controls, filings and counsel
Market data, cloud and vendor costs	US$[_____]	[___]%	Data, infrastructure and AI providers
Growth, partnerships and launch	US$[_____]	[___]%	Launch, partnerships and customer acquisition
Working capital and reserve	US$[_____]	[___]%	Operating runway and contingency
Total	**US$[_____]**	**100%**	

If the company raises less than the maximum, it may adjust the allocation, reduce spending or delay hiring. The company may need additional financing after the offering.

7. Management

Name	Role	Background
Malik Nlem	Chief Executive Officer / Director	[Verified biography to be inserted]
Victor Okechukwu	Vice President	[Verified biography to be inserted]
[Name]	[Role]	[Verified biography to be inserted]

The company's AI research function supports product development. An AI system is not a human officer, director, employee or fiduciary and does not replace management judgment.

8. Ownership

Holder	Security	Shares / instruments	Fully diluted %
[Founder / holder]	Common stock	[_____]	[___]%
[Investor]	Preferred stock	[_____]	[___]%
[SAFE holder]	SAFE	[_____]	[___]%
[Option pool]	Options reserved	[_____]	[___]%
Total		**[_____]**	**100%**

The ownership table must be reconciled to the cap table and the SAFE register before filing.

9. Risk factors

An investment in the company is speculative and involves a high degree of risk. You should be prepared to lose your entire investment. The following risks are material, but they are not the only risks.

9.1 Early-stage company

The company is early-stage. It may not achieve its product, launch, revenue or growth plan. It may need more capital than expected and may not be able to raise it on acceptable terms or at all.

9.2 No public market

There is no public market for the securities. They are restricted and may not be resold unless registered or an exemption is available. You should expect to hold them indefinitely.

DRAFT · COUNSEL REVIEW REQUIRED

9.3 Dilution

Future financings, option grants, warrants, convertible notes or SAFEs may dilute your ownership and reduce the value of your investment. The company may issue securities at a price below the price you pay.

9.4 Regulation CF and regulatory risk

The offering is subject to SEC qualification and ongoing reporting. The company may not obtain qualification, may receive SEC comments that delay or change the offering, or may be unable to comply with ongoing obligations. The company is not a licensed broker-dealer, investment adviser, exchange, custodian or fund.

9.5 Token, fund, brokerage and card risk

TBC is a proposed digital asset. No token has been issued and no token sale is open. TradingBible Capital has no fund vehicle, PPM, auditor, administrator, prime broker, custody or track record. Brokerage, card and fund products require approvals and partners the company does not currently have. Those products may never launch.

9.6 Technology and cybersecurity

The platform depends on third-party data, cloud infrastructure, brokers, payment processors, AI providers and other vendors. A service interruption, data error, cyberattack, credential compromise or software defect could harm the business, expose user data or cause regulatory action.

9.7 AI output

AI-generated reviews and research may be inaccurate, incomplete, biased or unsuitable. They are not investment advice. The company may not be able to control the cost, availability or accuracy of third-party models.

9.8 Competition

The trading-software, market-data, education and AI markets are competitive. Larger competitors may have more capital, data, distribution and regulatory resources.

9.9 Key personnel

The company depends on a small team. The loss of a key person or an inability to hire qualified staff could harm the business.

9.10 Financial reporting

The company's financial statements may be unaudited or reviewed rather than audited. Management figures may not be comparable to another company's figures. The company may have material weaknesses in its controls.

9.11 Tax and foreign investor risk

The tax treatment of the securities may be complex. Foreign investors may be subject to exchange-control, tax, AML, sanctions or reporting requirements in their home jurisdiction.

9.12 Forward-looking statements

This narrative contains forward-looking statements about product plans, launch timing, hiring, partnerships and financing. Those statements are estimates, not promises. The company may not update them.

DRAFT · COUNSEL REVIEW REQUIRED

10. Offering process

1. The company prepares the Form C and financial statements with counsel and the intermediary.
2. The company files the offering statement through the intermediary.
3. The SEC reviews and qualifies the offering statement.
4. The intermediary opens the campaign.
5. Investors review the qualified offering statement and complete the intermediary's eligibility and investment-limit process.
6. Investor funds are handled in escrow or the intermediary's compliant arrangement.
7. The company closes the offering when the closing conditions are satisfied.
8. The company files the required ongoing reports.

11. No offer until qualification

This narrative is not an offer to sell or a solicitation of an offer to buy securities. No offer will be made until the SEC qualifies the offering statement and the registered intermediary opens the campaign. Do not send money, provide payment details or reserve an allocation in response to this draft.

12. Certification

The undersigned certify that the narrative and risk factors have been reviewed against the company's records and that no statement has been represented as verified without a supporting source.
